

Here is the History of our AQUAHOL testimony from when AQUAHOL received US NEWS for DOUBLING the fuel mileage on a Hollywood Florida POLICE CAR with water and alcohol in 1979 and WON the BEST ECOLOGICAL PATENT PRIZE by the International Inventors Foundation in California in 1991, even against the ELECTRIC CARS and HYDROGEN Cars + was recommended by the UN TRADE DEVELOPMENT NEW COMMODITIES REPORT since 1994, at the first CLIMATE CHANGE CONFERENCE in GENEVA SWITZERLAND.

Video news and testimonials are included from the former Director of Energy of America under President Jimmy Carter + US AIR FORCE Captain that testified how AQUAHOL helped win the AIR WAR with AQUAHOL during World War II. A retired EXXON engineer also testified to the benefits of AQUAHOL, in addition to our professional video produced by Hollywood screen writer director Nickolas Klein, who has done productions with Super Stars such as MEL GIBSON.

*5. Here is a GULF OIL DIRECTOR testimony of WATER SPLITTING RESEARCH*

Thermochemical water-splitting not unknown to scientists from Gulf. Dr. John Norman from *General Atomic Company* is telling us of the hope for energy in water. It is ironic that an oil company is discovering the thermosplitting process initiated at 1600F, a temperature readily available in internal combustion engines that would clean up their act and make all internal combustion engines cheaper to operate, and more enduring.

6. *We have been recommended by the UN TRADE & DEVELOPMENT NEW COMMODITIES REPORT since 1994, at the first CLIMATE CHANGE CONFERENCE in GENEVA SWITZERLAND, for Aquahol on page 12 of the report.*

The PDF file is linked at the end

7. *We WON the BEST ECOLOGICAL PATENT PRIZE by the International Inventors Foundation in California in 1991*

*We got into a 1979 Rolls Royce with our system and beat other companies with solar, hydrogen and battery technologies; including big companies like Nissan, Ford, and General Motors. Judges determined that our technology was backward compatible for people with older vehicles who can't afford an electric car, and so we could impact the most people.*

8. *USDA RESEARCHES ALCOHOL INJECTION vs GASOHOL ALTERNATILVE?*

Here is a cut from the paper;

**"Research we did year's age indicated that using the alcohol by injection would be roughly 800% more efficient than through the gasohol approach, without regard for the extra costs of distilling alcohol to its driest state."**

So gasohol is Big Oil alternative but Aquahol is our alternative. The paper Issued April 11, 1980  
4969 USDA 771-80, The PDF file is linked at the end
